

BIO

MSC Dritan Marku was born in Mirdita in 1996. A child with big dreams, and with his feet on the ground. I finished primary school and high school in Rreshen, Mirdita. Still not realizing what he wanted to become in life, he knew very well that he wanted to leave a mark on this country.

In 2015 the dreams he had, began to take shape. He started his studies at the University "Barleti", Bachelor in Physical Education and Sports and in 2020 managed to graduate with a Master of Science in "Teacher of Physical Education and Sports".

The university taught him many things. There he realized the importance of cooperation, hard work and an iron will to do his best in his academic journey. All his efforts helped him to be employed by a prestigious college like "Turgut Ozal" College in the profession as a teacher of Physical Education and Sports with a period of time, 1 year. Working with children pushed her to went deeper into scientific research to better understand the psychology and education of children.

He was not satisfied with that and every day he tried to gain new knowledge, recall the lectures of his professors and study systematically.

Today, thanks to his tireless work, he expects to be employed at the institution in which he discovered himself. He is always looking to create a worthy and important image towards his academic, scientific journey in relation to sports sciences.
